

MCL has supplied 105% of the agreed quantity to NALCO

The Angul unit of NALCO has executed a Fuel Supply agreement with MCL for the supply of 4.71 Million Tonnes. of coal per year. During the current year, upto 8th July, MCL has supplied 1.35 Million Tonnes of coal against the pro-rata quantity of 1.27 Million Tonnes. Thus MCL has supplied 105% of the agreed quantity to NALCO during the above period.

With reference to NTPC, the supply of coal has been to the extent of 99% in the month of July and 91% overall in this calendar year. It may also be seen that this is no mean achievement especially during the grueling summer season.

Besides, before the coal is dispatched to consumers like NALCO & NTPC, Joint sampling system is followed where representatives of the consumer and MCL analyze the coal at the loading point and after satisfaction of both the parties, the coal is dispatched. Hence MCL makes sure that quality as well as quantity to the satisfaction of the consumer remains our priority.
